

Assignment 2

1. Implement basic validation within the BookList component to prevent progression to the next step unless a book has been selected by the user

```
import { useState } from "react";
import "../App.css";

function Q1() {
  const [, setBooks] = useState([]);
  const [hasError, setHasError] = useState(false);

  const handleFormSubmit = (event) => {
    event.preventDefault();
    const selectedBooks = [];

    for (let element of event.target.elements) {
      if (element.checked && element.type === "checkbox") {
        selectedBooks.push(element.value);
      }
    }

    if (!selectedBooks.length) {
      setHasError(true);
      return;
    }

    setBooks(selectedBooks);
    console.log(selectedBooks);
  };

  return (
    <div>
      <h1>
        Choose from a wide variety of book available in our store
      </h1>
      {hasError && (
        <div className="error">
          <p>Please select at least one book.</p>
        </div>
      )}

      <form onSubmit={handleFormSubmit}>
        <table>
          <tbody>
            <tr>
              <td>
                <input
                  type="checkbox"
                  value="Zero to one -- Peter Thiel"
                />
              </td>
              <td>
                <label>Zero to one -- Peter Thiel</label>
              </td>
            </tr>
          </tbody>
        </table>
      </form>
    </div>
  );
}
```

```

<tr>
  <td>
    <input
      type="checkbox"
      value="The Monk who sold his ferrari -- Robin Sharma"
    />
  </td>
  <td>
    <label>
      The Monk who sold his ferrari -- Robin
      Sharma
    </label>
  </td>
</tr>
<tr>
  <td>
    <input
      type="checkbox"
      value="The Alchemist -- Paulo Coelho"
    />
  </td>
  <td>
    <label>The Alchemist -- Paulo Coelho</label>
  </td>
</tr>
<tr>
  <td>
    <input
      type="checkbox"
      value="The Power of Now -- Eckhart Tolle"
    />
  </td>
  <td>
    <label>
      The Power of Now -- Eckhart Tolle
    </label>
  </td>
</tr>
<tr>
  <td>
    <input
      type="checkbox"
      value="Wings of fire -- APJ Abdul Kalam"
    />
  </td>
  <td>
    <label>
      Wings of fire -- APJ Abdul Kalam
    </label>
  </td>
</tr>
<tr>
  <td>
    <input type="submit" value="Submit" />
  </td>
</tr>
</tbody>
</table>

```

```

    </form>
  </div>
</>
);
}

```

```
export default Q1;
```

Choose from a wide variety of book available in our store

- ☐ Zero to one -- Peter Thiel
- ☐ The Monk who sold his ferrari -- Robin Sharma
- ☐ The Alchemist -- Paulo Coelho
- ☐ The Power of Now -- Eckhart Tolle
- ☐ Wings of fire -- APJ Abdul Kalam

Submit

Choose from a wide variety of book available in our store

Please select at least one book.

- ☐ Zero to one -- Peter Thiel
- ☐ The Monk who sold his ferrari -- Robin Sharma
- ☐ The Alchemist -- Paulo Coelho
- ☐ The Power of Now -- Eckhart Tolle
- ☐ Wings of fire -- APJ Abdul Kalam

Submit

2. Make the form like below in React with decrement timer

```
import { useEffect, useState } from "react";
import "./App.css";
```

```
const Timer = () => {
  const [time, setTime] = useState(900);
```

```
  useEffect(() => {
    let timer = setInterval(() => {
      setTime((time) => {
        if (time === 0) {
          clearInterval(timer);
          setTime(900);
          alert("Time is up!");
          return 0;
        } else return time - 1;
      });
    }, 1000);
  }, []);
```

```
  return (
    <div className="bg">
      <p>
        <strong>Time Left:</strong>{" "}
        ${Math.floor(time / 60)}\`padStart(2, 0)} minutes{" "}
```

```

        {'${time % 60}'.padStart(2, 0)} seconds before confirming order
      </p>
    </div>
  );
};

export default function Q2() {
  const handleSubmit = () => {
    alert("Your order has been placed successfully!");
  };
  return (
    <>
      <h1>Enter your Shipping Information</h1>
      <Timer />
      <form>
        <table>
          <tbody>
            <tr>
              <input type="text" placeholder="Full Name" />
            </tr>
            <tr>
              <input type="text" placeholder="Contact Number" />
            </tr>
            <tr>
              <input type="text" placeholder="Shipping Address" />
            </tr>
            <tr>
              <button onClick={handleSubmit}>Submit</button>
            </tr>
          </tbody>
        </table>
      </form>
    </>
  );
}

```

Enter your Shipping Information

Time Left: 14 minutes 56 seconds before confirming order

Enter your Shipping Information

Time Left: 13 minutes 26 seconds before confirming order

Harsh Shah
